

The coastal garden display is one of four garden styles that won a Gold Show Garden Award at the Melbourne International Flower and Garden Show.

Landscape for all seasons

GARDENING

THE Yates-sponsored Green Lifestyle garden, designed and built by Seasons Landscapes in conjunction with the Tree & Shrub Growers of Victoria, won a Gold Show Garden Award at this year's Melbourne International Flower and Garden Show.

This inspiring display featured four easy-to-reproduce landscapes to suit varied lifestyles.

The Family Garden

This combines play spaces for kids with a well-planned entertaining area for the adults,

with colour, texture, flowers and fragrance to create interest. Yates Lawn Master will continue feeding for up to three months.

Yates BuffaloPro hose on is the easy way to remove weeds, even in buffalo lawns. Gentle Dynamic Lifter Organic Plant Food pellets can be used to feed every plant.

The Kitchen Garden

You don't need a big space to grow vegetables, fruit and herbs.

Yates Blood & Bone has been enriching family vegetable gardens for generations.

Feed fruit trees with Dynamic

Lifter Advanced for Fruit & Citrus. Its natural base is boosted with fruit-promoting nutrients.

Choose low toxic options such as the Yates Nature's Way range to feed your kitchen garden and control pests.

The Coastal Garden

Hot sun, strong winds and salt can make coastal life difficult for plants.

Yates GroPlus Moisture-Retaining Mulch will help stop plants drying out while they are establishing, Yates Soil Saturators help ensure water gets to the roots, and Yates DroughtShield will protect

plants from sunburn, salt spray and water loss.

The City Garden

A well-designed garden can provide a sanctuary.

Yates Tuscan Edge pots have a self-watering feature that makes them easier to look after and last longer between waterings. Plants in containers need regular fertilising. Yates Acticote Pots, Planters & Indoor Plants feeds for four months.

Yates GroPlus Advanced Potting Mix has water crystals, long-lasting fertiliser and a natural bio-stimulant to encourage growth.
